Summary

I'm a Tech-driven and self-motivated developer born in 2003. Started web dev learning in early 2022. I have 1 year of hands-on experience with Laravel, PHP, and MySQL, along with frontend skills in HTML, CSS, JavaScript, and JQuery. I am the solo developer, which has given me a strong sense of responsibility and problem-solving. However, I haven't had opportunities to work in a collaborative development environment, and I truly want to grow beyond that.
